

BUSINESS ENERGY

VERSUS

DOMESTIC ENERGY

COMPARING THE 2 TYPES OF ENERGY

Designed by [Hamed Adefuwa](#)

Business energy prices can change often

Business energy rates have a VAT at the current rate of 20%

Business energy suppliers buy energy as and when a contract is set up

Business energy contracts are almost always fixed for a period of 1, 2 or 3 years, or more rarely, 4 to 5 years

Domestic energy prices are stable for around 6 months at a time

Domestic energy rates have a VAT charge of 5%

Domestic energy suppliers buy their energy a few months in advance for all of their customers

Domestic energy contracts are 'rolling' contracts that don't have definitive end dates
